

Plasma Processes 2

individual design and implementation of plasma processes

Rating: Not Rated Yet

[Ask a question about this product](#)

Brief description

For our consulting articles we offer **individual** help and support - please give us a first description of your desired scope of services or the upcoming problem by phone or email. We will coordinate the further procedure directly with you.

Sample

A possible project constellation includes the use of our or our own plasma processes for development, analysis or prototype construction, only incl. operator
- effort not less than 5 man-days - an exact estimation will be made in the individual offer

Key aspects

- technical lighting
- trouble-shooting
- holography
- optical coatings
- surface properties

[Overview technical focal points](#)

Product benefits

- short reaction times and help with plasma applications from atmospheric plasma to ultra-high vacuum
- strongly shortened learning and experience times for new projects
- fast and efficient access to specialized know-how and equipment

Form

personal service, place of performance as agreed with the customer

Scope / Volume

scientific-technical transfer and consulting services as well as analyses in special, complex or extensive areas of focus that lead to new findings and results. The use of the required and already existing machines and equipment is included
- additionally required materials, external services and possibly arising expenses will be charged additionally

Preparation

Results according to customer specifications, e.g. in electronic, printed, sketched or spoken form, also possible "hands-on" e.g. as direct assistance in the customer project/process or preparation and set-up of suitable technical test regulations or test stations

Project duration /

scheduling

upon

consultation

Available Variants /

Execution

Place of performance in our company rooms,
at the customer, at third parties

Additional

information

[ISO 9001 2015](#) | [terms](#)

Special features

special types of contract such as extended rights of use, exclusivity etc. are possible

Available

Language

German, English

(other languages also possible)

File size

after consultation if required

Password security

after consultation if required

Format / Resolution

after consultation if required

Licenses of use

simple right of use of services and results based on our existing and newly arising rights within the scope of such a project

Requirements

Request with description of the desired scope of services

Bidirectional NDA
